

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'fgconsole.1'***

**C:\>man fgconsole.1**

FGCONSOLE(1)                      Linux User's Manual                      FGCONSOLE(1)

### NAME

fgconsole - print the number of the active VT.

### SYNOPSIS

fgconsole [ -h --help | -V --version | -n --next-available ]

### DESCRIPTION

If the active Virtual Terminal is /dev/ttyN, then prints N on standard output.

If the console is a serial console, then "serial" is printed instead.

-h --help

Prints short usage message and exits.

-V --version

Prints version number and exits.

--next-available

Will show the next unallocated virtual terminal. Normally 6 virtual termi-

nals are allocated, with number 7 used for X; this will return "8" in this

case.

## NOTES

Under devfs, the consoles are in /dev/vc/N. devfsd may maintain symlinks for compatibility.
