

Rocky Enterprise Linux 9.2 Manual Pages on command 'gpg-zip.1'

C:\>man gpg-zip.1

GPG-ZIP(1) General Commands Manual GPG-ZIP(1)

NAME

gpg-zip - encrypt or sign files into an archive

SYNOPSIS

gpg-zip [OPTIONS] filename1 [filename2, ...] directory1 [directory2, ...]

DESCRIPTION

This manual page documents briefly the gpg-zip command.

gpg-zip IS DEPRECATED. PLEASE USE gpgtar(1) instead.

gpg-zip encrypts or signs files into an archive. It is an gpg-ized tar using the same format as PGP's PGP Zip.

OPTIONS

-e, --encrypt

Encrypt data. This option may be combined with --symmetric (for output that may be decrypted via a secret key or a passphrase).

-d, --decrypt

Decrypt data.

-c, --symmetric

Encrypt with a symmetric cipher using a passphrase. The default symmetric cipher used is CAST5, but may be chosen with the --cipher-algo option to gpg(1).

-s, --sign

Make a signature. See gpg(1).

`-r, --recipient USER`

Encrypt for user id USER. See `gpg(1)`.

`-u, --local-user USER`

Use USER as the key to sign with. See `gpg(1)`.

`--list-archive`

List the contents of the specified archive.

`-o, --output FILE"`

Write output to specified file FILE.

`--gpg GPG`

Use the specified command instead of `gpg`.

`--gpg-args ARGS`

Pass the specified options to `gpg(1)`.

`--tar TAR`

Use the specified command instead of `tar`.

`--tar-args ARGS`

Pass the specified options to `tar(1)`.

`-h, --help`

Output a short usage information.

`--version`

Output the program version.

DIAGNOSTICS

The program returns 0 if everything was fine, 1 otherwise.

EXAMPLES

Encrypt the contents of directory `mydocs` for user Bob to file `test1`:

```
gpg-zip --encrypt --output test1 --gpg-args -r Bob"" mydocs
```

List the contents of archive `test1`:

```
gpg-zip --list-archive test1
```
