

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'infobrowser.1'***

**C:\>man infobrowser.1**

INFO(1) User Commands INFO(1)

### NAME

info - read Info documents

### SYNOPSIS

info [OPTION]... [MENU-ITEM...]

### DESCRIPTION

Read documentation in Info format.

Frequently-used options:

-a, --all

use all matching manuals

-k, --apropos=STRING

look up STRING in all indices of all manuals

-d, --directory=DIR

add DIR to INFOPATH

-f, --file=MANUAL

specify Info manual to visit

-h, --help

display this help and exit

--index-search=STRING

go to node pointed by index entry STRING

-n, --node=NODENAME

specify nodes in first visited Info file

`-o, --output=FILE`

output selected nodes to FILE

`-O, --show-options, --usage`

go to command-line options node

`--subnodes`

recursively output menu items

`-v, --variable VAR=VALUE`

assign VALUE to Info variable VAR

`--version`

display version information and exit

`-w, --where, --location`

print physical location of Info file

The first non-option argument, if present, is the menu entry to start from; it is searched for in all 'dir' files along INFOPATH. If it is not present, info merges all 'dir' files and shows the result. Any remaining arguments are treated as the names of menu items relative to the initial node visited.

For a summary of key bindings, type H within Info.

## EXAMPLES

`info show top-level dir menu`

`info info-stdn`

show the manual for this Info program

`info emacs`

start at emacs node from top-level dir

`info emacs buffers`

select buffers menu entry in emacs manual

`info emacs -n Files`

start at Files node within emacs manual

`info '(emacs)Files'`

alternative way to start at Files node

`info --show-options emacs`

start at node with emacs' command line options

`info --subnodes -o out.txt emacs`

dump entire emacs manual to out.txt

info -f ./foo.info

show file ./foo.info, not searching dir

## REPORTING BUGS

Email bug reports to [bug-texinfo@gnu.org](mailto:bug-texinfo@gnu.org), general questions and discussion to [help-texinfo@gnu.org](mailto:help-texinfo@gnu.org).

Texinfo home page: <http://www.gnu.org/software/texinfo/>

## COPYRIGHT

## SEE ALSO

The full documentation for info is maintained as a Texinfo manual. If the info program is properly installed at your site, the command

info info

should give you access to the complete manual. (Or, if you have Emacs, M-x info will lead to the manual.)
