

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'ischroot.1'***

**C:~>man ischroot.1**

ISCHROOT(1)                    General Commands Manual                    ISCHROOT(1)

### NAME

ischroot - detect if running in a chroot

### SYNOPSIS

ischroot [--default-false] [--default-true] [--help] [--version]

### DESCRIPTION

ischroot detects if it is currently running in a chroot. The exit status is:

- 0    if currently running in a chroot
- 1    if currently not running in a chroot
- 2    if the detection is not possible (On GNU/Linux this happens if the script is not run as root).

### OPTIONS

-f, --default-false

Exit with status 1 if the detection is not possible.

-t, --default-true

Exit with status 0 if the detection is not possible.

--help Print a usage message on standard output and exit successfully.

--version

Print version information on standard output and exit successfully.

### BUGS

On GNU/Linux, chroot detection is not possible when not root. This works correctly on GNU/Hurd and GNU/kFreeBSD.
