

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'runc-kill.8'***

**C:\>man runc-kill.8**

runc-kill (8"") runc-kill (8"")

### NAME

runc-kill - send a specified signal to container

### SYNOPSIS

runc kill [--all|-a] container-id [signal]

### DESCRIPTION

By default, runc kill sends SIGTERM to the container's initial process only.

A different signal can be specified either by its name (with or without the SIG prefix), or its numeric value. Use kill(1) with -l option to list available signals.

### OPTIONS

--all|-a : Send the signal to all processes inside the container.

### EXAMPLES

The following will send a KILL signal to the init process of the ubuntu01 container:

```
# runc kill ubuntu01 KILL
```

SEE ALSO

runc(1).

runc-kill (8")
