

Rocky Enterprise Linux 9.2 Manual Pages on command 'setlogcons.8'

C:\>man setlogcons.8

SETLOGCONS(8) Linux User's Manual SETLOGCONS(8)

NAME

setlogcons - Send kernel messages to console N

SYNOPSIS

setlogcons N

DESCRIPTION

The command setlogcons N sets all kernel messages to the console specified as N.

By default kernel messages are sent to the current console.

To change the level of messages sent, use dmesg

AUTHORS

setlogcons was originally written by Andries Brouwer for the kbd package.

This manual page was written by Alastair McKinstry.
