

Rocky Enterprise Linux 9.2 Manual Pages on command 'setsid.1'

C:\>man setsid.1

SETSID(1) User Commands SETSID(1)

NAME

setsid - run a program in a new session

SYNOPSIS

setsid [options] program [arguments]

DESCRIPTION

setsid runs a program in a new session. The command calls fork(2) if already a process group leader. Otherwise, it executes a program in the current process.

This default behavior is possible to override by the --fork option.

OPTIONS

-c, --ctty

Set the controlling terminal to the current one.

-f, --fork

Always create a new process.

-w, --wait

Wait for the execution of the program to end, and return the exit value of this program as the return value of setsid.

-V, --version

Display version information and exit.

-h, --help

Display help text and exit.
