**C:\>man settyent.3**

GETTTYENT(3)                      Linux Programmer's Manual                      GETTTYENT(3)

### NAME

gettyent, gettynam, settyent, endttyent - get ttys file entry

### SYNOPSIS

```
#include <ttyent.h>

struct ttyent *gettyent(void);

struct ttyent *gettynam(const char *name);

int settyent(void);

int endttyent(void);
```

### DESCRIPTION

These functions provide an interface to the file `_PATH_TTYS` (e.g., `/etc/ttys`).

The function `settyent()` opens the file or rewinds it if already open.

The function `endttyent()` closes the file.

The function `gettynam()` searches for a given terminal name in the file. It returns a pointer to a `ttyent` structure (description below).

The function `gettyent()` opens the file `_PATH_TTYS` (if necessary) and returns the first entry. If the file is already open, the next entry. The `ttyent` structure has the form:

```
struct ttyent {
    char *ty_name;    /* terminal device name */
    char *ty_getty;   /* command to execute, usually getty */
    char *ty_type;   /* terminal type for termcap */
```

```
int ty_status; /* status flags */

char *ty_window; /* command to start up window manager */

char *ty_comment; /* comment field */

};
```

ty\_status can be:

```
#define TTY_ON 0x01 /* enable logins (start ty_getty program) */

#define TTY_SECURE 0x02 /* allow UID 0 to login */
```

## ATTRIBUTES

For an explanation of the terms used in this section, see attributes(7).

??

?Interface ? Attribute ? Value ?

??

?gettyent(), setttyent(), ? Thread safety ? MT-Unsafe race:tttyent ?

?endtttyent(), getttynam() ? ? ?

??

## CONFORMING TO

Not in POSIX.1. Present on the BSDs, and perhaps other systems.

## NOTES

Under Linux, the file /etc/ttys, and the functions described above, are not used.

## SEE ALSO

ttynam(3), ttyslot(3)

## COLOPHON

This page is part of release 5.05 of the Linux man-pages project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at <https://www.kernel.org/doc/man-pages/>.
