SYSTEMD-IMPORTD.SERVICE(8) systemd-importd.service SYSTEMD-IMPORTD.SERVICE(8)

NAME

systemd-importd.service, systemd-importd - VM and container image import and export service

SYNOPSIS

systemd-importd.service
/lib/systemd/systemd-importd

DESCRIPTION

systemd-importd is a system service that allows importing, exporting and downloading of system images suitable for running as VM or containers. It is a companion service for systemd-machined.service(8), and provides the implementation for machinectl(1)'s pull-raw, pull-tar, import-raw, import-tar, export-raw, and export-tar commands.

See the importd D-Bus API Documentation[1] for information about the APIs systemd-importd provides.

SEE ALSO

systemd(1), machinectl(1), systemd-machined.service(8), systemd-nspawn(1)
