**C:~>man systemd-localed.8**

SYSTEMD-LOCALED.SERVICE(8)    systemd-localed.service    SYSTEMD-LOCALED.SERVICE(8)

### NAME

systemd-localed.service, systemd-localed - Locale bus mechanism

### SYNOPSIS

systemd-localed.service  
/lib/systemd/systemd-localed

### DESCRIPTION

systemd-localed is a system service that may be used as mechanism to change the system locale settings, as well as the console key mapping and default X11 key mapping. systemd-localed is automatically activated on request and terminates itself when it is unused.

The tool `localectl(1)` is a command line client to this service.

See the developer documentation[1] for information about the APIs systemd-localed provides.

### SEE ALSO

systemd(1), locale.conf(5), vconsole.conf(5), `localectl(1)`, `loadkeys(1)`
