C:\>man udisksd.8

UDISKSD(8) System Daemon UDISKSD(8)

NAME

udisksd - The udisks system daemon

SYNOPSIS

udisksd [--help] [--replace] [--debug] [--no-sigint] [--force-load-modules]

DESCRIPTION

The udisksd program provides the org.freedesktop.UDisks2 name on the system message bus. Users or administrators should never need to start this daemon as it will be automatically started by dbus-daemon(1) or systemd(1) whenever an application tries to access its D-Bus interfaces.

See the udisks(8) man page for more information.

OPTIONS

--help

Show help options.

--replace

Replace existing daemon.

--debug

Print debug or informational messages on stdout/stderr.

--no-sigint

Do not handle SIGINT for controlled shutdown.

--force-load-modules

Activate modules on startup

AUTHOR

This man page was originally written for UDisks2 by David Zeuthen
<zeuthen@gmail.com> with a lot of help from many others.

BUGS

Please send bug reports to either the distribution bug tracker or the upstream bug tracker at <https://github.com/storaged-project/udisks/issues>.
