UNICODE_STOP(1) General Commands Manual UNICODE_STOP(1)

NAME

unicode_stop - revert keyboard and console from unicode mode

SYNOPSIS

unicode_stop

DESCRIPTION

The `unicode_stop` command will more-or-less undo the effect of `unicode_start`. It puts the keyboard in ASCII (XLATE) mode, and clears the console UTF-8 mode.

SEE ALSO

`kbd_mode(1)`, `unicode_start(1)`, `utf-8(7)`, `setfont(8)`
