C:\>man xzegrep.1

XZGREP(1) XZ Utils XZGREP(1)

NAME

xzegrep - search compressed files for a regular expression

SYNOPSIS

xzegrep [grep_options] [-e] pattern file...

xzegrep ...

xzfgrep ...

lzgrep ...

lzegrep ...

lzfgrep ...

DESCRIPTION

xzegrep invokes grep(1) on files which may be either uncompressed or compressed with xz(1), lzma(1), gzip(1), bzip2(1), or lzop(1). All options specified are passed directly to grep(1).

If no file is specified, then standard input is decompressed if necessary and fed to grep(1). When reading from standard input, gzip(1), bzip2(1), and lzop(1) compressed files are not supported.

If `xzgrep` is invoked as `xzegrep` or `xzfgrep` then `egrep(1)` or `fgrep(1)` is used instead of `grep(1)`. The same applies to names `lzgrep`, `lzegrep`, and `lzfgrep`, which are provided for backward compatibility with LZMA Utils.

ENVIRONMENT

GREP If the GREP environment variable is set, `xzgrep` uses it instead of `grep(1)`, `egrep(1)`, or `fgrep(1)`.

SEE ALSO

`grep(1)`, `xz(1)`, `gzip(1)`, `bzip2(1)`, `lzop(1)`, `zgrep(1)`
