

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'zegrep.1'***

**C:\>man zegrep.1**

ZGREP(1)                    General Commands Manual                    ZGREP(1)

### NAME

zegrep - search possibly compressed files for a regular expression

### SYNOPSIS

zegrep [ grep\_options ] [ -e ] pattern filename...

### DESCRIPTION

Zgrep invokes grep on compressed or gzipped files. All options specified are passed directly to grep. If no file is specified, then the standard input is `de?` compressed if necessary and fed to grep. Otherwise the given files are uncompressed if necessary and fed to grep.

If the GREP environment variable is set, zegrep uses it as the grep program to be invoked.

### EXIT STATUS

Exit status is 0 for a match, 1 for no matches, and 2 if trouble.

### BUGS

The following grep options are not supported: `--dereference-recursive (-R)`, `--directories (-d)`, `--exclude`, `--exclude-from`, `--exclude-dir`, `--include`, `--null (-Z)`, `--null-data (-z)`, and `--recursive (-r)`.
