

Windows PowerShell Get-Help on Cmdlet 'Add-AppxVolume'

PS:\>Get-HELP Add-AppxVolume -Full

NAME

Add-AppxVolume

SYNOPSIS

Adds an appx volume to the Package Manager.

SYNTAX

Add-AppxVolume [-Path] <System.String[]> [-Confirm] [-WhatIf] [<CommonParameters>]

DESCRIPTION

The `Add-AppxVolume` cmdlet adds an AppxVolume for the Package Manager to advertise. After you add a volume, Appx deployment operations can use that volume as a target. This cmdlet returns the volume that it adds. Note, the Path parameter must be specified as a drive letter followed by `WindowsApps` as the directory. Not using this format could lead to inconsistent behavior in the application model subsystems or the volume itself. For more information, see the examples section.

PARAMETERS

`-Path <System.String[]>`

Specifies the path of the mount point of the volume that this cmdlet adds.

Required? true

Position? 1

Default value None

Accept pipeline input? True (ByPropertyName, ByValue)
