

Windows PowerShell Get-Help on Cmdlet 'Add-AzTrafficManagerExpectedStatusCodeRange'

PS:\>Get-HELP Add-AzTrafficManagerExpectedStatusCodeRange -Full

NAME

Add-AzTrafficManagerExpectedStatusCodeRange

SYNOPSIS

Adds an expected status code range to a local Traffic Manager profile object.

SYNTAX

```
                                Add-AzTrafficManagerExpectedStatusCodeRange                                [-DefaultProfile
<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] -Max
                                <System.Int32>                                -Min                                <System.Int32>                                -TrafficManagerProfile
<Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile> [-Confirm] [-WhatIf]
                                [<CommonParameters>]
```

DESCRIPTION

The Add-AzTrafficManagerExpectedStatusCodeRange cmdlet adds a range of expected status codes to a local Azure Traffic Manager profile object. You can get a profile by

using the New-AzTrafficManagerProfile or Get-AzTrafficManagerProfile cmdlets.

This cmdlet operates on the local profile object. Commit your changes to the profile for Traffic Manager by using the Set-AzTrafficManagerProfile cmdlet.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-Max <System.Int32>

Specifies the highest value in the status code range to be added.

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-Min <System.Int32>

Specifies the lowest value in the status code range to be added.

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-TrafficManagerProfile <Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile>

Specifies a local TrafficManagerProfile object. This cmdlet modifies this local object. To obtain a TrafficManagerProfile object, use the

Get-AzTrafficManagerProfile cmdlet.

Required?	true
Position?	named
Default value	None
Accept pipeline input?	True (ByValue)
Accept wildcard characters?	false

-Confirm <System.Management.Automation.SwitchParameter>

Prompts you for confirmation before running the cmdlet.

Required?	false
Position?	named
Default value	False
Accept pipeline input?	False
Accept wildcard characters?	false

-WhatIf <System.Management.Automation.SwitchParameter>

Shows what would happen if the cmdlet runs. The cmdlet is not run.

Required?	false
Position?	named
Default value	False
Accept pipeline input?	False
Accept wildcard characters?	false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile

OUTPUTS

Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile

NOTES

-- Example 1: Add an expected status code range to a profile --

```
$TrafficManagerProfile = Get-AzTrafficManagerProfile -Name "ContosoProfile" -ResourceGroupName  
"ResourceGroup11"  
Add-AzTrafficManagerExpectedStatusCodeRange -TrafficManagerProfile $TrafficManagerProfile -Min 200 -Max 499  
Set-AzTrafficManagerProfile -TrafficManagerProfile $TrafficManagerProfile
```

The first command gets an Azure Traffic Manager profile by using the Get-AzTrafficManagerProfile cmdlet. The command stores the local profile in the

\$TrafficManagerProfile variable. The second command adds an expected status code range to the profile stored in \$TrafficManagerProfile. The final command updates the

profile in Traffic Manager to match the local value in \$TrafficManagerProfile.
