

Windows PowerShell Get-Help on Cmdlet 'Confirm-SecureBootUEFI'

PS:\>Get-HELP Confirm-SecureBootUEFI -Full

NAME

Confirm-SecureBootUEFI

SYNOPSIS

Confirms that Secure Boot is enabled by checking the Secure Boot status on the local computer.

SYNTAX

Confirm-SecureBootUEFI [<CommonParameters>]

DESCRIPTION

The Confirm-SecureBootUEFI cmdlet confirms that Secure Boot is enabled by checking the Secure Boot status on a UEFI computer.

If the computer supports Secure Boot and Secure Boot is enabled, this cmdlet returns \$True.

If the computer supports Secure Boot and Secure Boot is disabled, this cmdlet returns \$False.

If the computer does not support Secure Boot or is a BIOS (non-UEFI) computer, this cmdlet displays the following error message.

`Cmdlet not supported on this platform.`

If Windows PowerShell is not run in administrator mode, this cmdlet displays the following:

`Unable to set proper privileges. Access was denied.`

This cmdlet requires that Windows PowerShell be run in administrator mode.

PARAMETERS

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

None

OUTPUTS

System.Boolean

This cmdlet returns a Boolean. If the computer supports Secure Boot and Secure Boot is enabled, this cmdlet returns \$True.

If the computer supports Secure Boot and Secure Boot is disabled, this cmdlet returns \$False.

If the computer does not support Secure Boot or is a BIOS (non-UEFI) computer, this cmdlet displays the following:

`Cmdlet not supported on this platform`.
