Windows PowerShell Get-Help on Cmdlet 'Disable-AzDataCollection'

PS:\>Get-HELP Disable-AzDataCollection -Full

NAME

   Disable-AzDataCollection

SYNOPSIS

   Opts out of collecting data to improve the Azure PowerShell cmdlets. Data is collected by default unless you explicitly opt out.

SYNTAX

            Disable-AzDataCollection   [-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Confirm] [-WhatIf]

   [<CommonParameters>]

DESCRIPTION

   The `Disable-AzDataCollection` cmdlet is used to opt out of data collection. Azure PowerShell automatically collects telemetry data by default. To disable data

   collection, you must explicitly opt-out. Microsoft aggregates collected data to identify patterns of usage, to identify common issues, and to improve the experience

   of Azure PowerShell. Microsoft Azure PowerShell doesn't collect any private or personal data. If you've previously opted

out, run the `Enable-AzDataCollection` cmdlet

to re-enable data collection for the current user on the current machine.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with Azure.

Required?   false

Position?   named
