

Windows PowerShell Get-Help on Cmdlet 'Disable-AzTrafficManagerProfile'

PS:\>Get-HELP Disable-AzTrafficManagerProfile -Full

NAME

Disable-AzTrafficManagerProfile

SYNOPSIS

Disables a Traffic Manager profile.

SYNTAX

```

                                Disable-AzTrafficManagerProfile                                [-DefaultProfile
<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Force] -Name
                                <System.String> -ResourceGroupName <System.String> [-Confirm] [-WhatIf] [<CommonParameters>]

```

```

                                Disable-AzTrafficManagerProfile                                [-DefaultProfile
<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Force]
                                -TrafficManagerProfile <Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile> [-Confirm] [-WhatIf]
                                [<CommonParameters>]

```

DESCRIPTION

The Disable-AzTrafficManagerProfile cmdlet disables an Azure Traffic Manager profile. You can specify the profile object

by using the pipeline or as a parameter

value. Alternatively, you can specify the profile by using the Name and ResourceGroupName parameters.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-Force <System.Management.Automation.SwitchParameter>

Forces the command to run without asking for user confirmation.

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false

-Name <System.String>

Specifies the name of the Traffic Manager profile that this cmdlet disables.

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-ResourceGroupName <System.String>

Specifies the name of a resource group. This cmdlet disables a Traffic Manager profile in the group that this parameter specifies.

Required?	true
Position?	named
Default value	None
Accept pipeline input?	False
Accept wildcard characters?	false

-TrafficManagerProfile <Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile>

Specifies a TrafficManagerProfile object to disable. To obtain a TrafficManagerProfile object, use the Get-AzTrafficManagerProfile cmdlet.

Required?	true
Position?	named
Default value	None
Accept pipeline input?	True (ByValue)
Accept wildcard characters?	false

-Confirm <System.Management.Automation.SwitchParameter>

Prompts you for confirmation before running the cmdlet.

Required?	false
Position?	named
Default value	False
Accept pipeline input?	False
Accept wildcard characters?	false

-WhatIf <System.Management.Automation.SwitchParameter>

Shows what would happen if the cmdlet runs. The cmdlet is not run.

Required?	false
Position?	named

Default value False
Accept pipeline input? False
Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

Microsoft.Azure.Commands.TrafficManager.Models.TrafficManagerProfile

OUTPUTS

System.Boolean

NOTES

----- Example 1: Disable a profile specified by name -----

Disable-AzTrafficManagerProfile -Name "ContosoProfile" -ResourceGroupName "ResourceGroup11"

This command disables the profile named ContosoProfile in ResourceGroup11. The command prompts you for confirmation.

----- Example 2: Disable a profile by using the pipeline -----

```
Get-AzTrafficManagerProfile -Name "ContosoProfile" -ResourceGroupName "ResourceGroup11" |  
Disable-AzTrafficManagerProfile -Force
```

This command gets the profile named ContosoProfile in ResourceGroup11. The command then passes that profile to the Disable-AzTrafficManagerProfile cmdlet by using the pipeline operator. That cmdlet disables that profile. The command specifies the Force parameter. Therefore, it does not prompt you for confirmation.
