Default value None

Accept pipeline input? False

Accept wildcard characters? false

-GenerateDownloadUrl <System.Management.Automation.SwitchParameter>

Generate the download url of the invoices.

Required? false

Position? named
Default value False
Accept pipeline input? False
Accept wildcard characters? false

-Latest <System.Management.Automation.SwitchParameter>

Get the latest invoice.

Required? true
Position? named
Default value False
Accept pipeline input? False
Accept wildcard characters? false

-MaxCount <System.Nullable`1[System.Int32]>

Determines the maximum number of records to return.

Required? false
Position? named
Default value None
Accept pipeline input? False
Accept wildcard characters? false

-Name <System.Collections.Generic.List`1[System.String]>

Name of a specific invoice to get or the most recent if not specified.

Required? true
Position? named
Default value None
Accept pipeline input? False
Accept wildcard characters? false

-BillingAccountName <System.Collections.Generic.List`1[System.String]>

Name of a specific billing account to get invoices for.

Required? true
Position? named
Default value None
Accept pipeline input? False
Accept wildcard characters? false

-BillingProfileName <System.Collections.Generic.List`1[System.String]>

Name of a specific billing profile to get invoices for.

Required? true
Position? named
Default value None
Accept pipeline input? False
Accept wildcard characters? false

-PeriodStartDate <System.Collections.Generic.List`1[System.String]>

Start date for invoice.

Required? true
Position? named
Default value None
Accept pipeline input? False
Accept wildcard characters? false

-PeriodEndDate <System.Collections.Generic.List`1[System.String]>

End date for invoice.

Required? true
Position? named
Default value None
Accept pipeline input? False

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

None

OUTPUTS

Microsoft.Azure.Commands.Billing.Models.PSInvoice

NOTES

----- Example 1 -----

Get-AzBillingInvoice -Latest

Get the latest invoice of the subscription.

----- Example 2 -----

Get-AzBillingInvoice -Name 2017-02-18-432543543

Get the invoice of the subscription with the specified name.

----- Example 3 -----

Get-AzBillingInvoice

Get all available invoices of the subscription in reverse chronological order beginning with the most recent invoice without download Url.

----- Example 4 -----

Get-AzBillingInvoice -GenerateDownloadUrl -MaxCount 10

Get most recent 10 invoices of the subscription and include the download Url in the result.

----- Example 5 -----

Get-AzBillingInvoice -Name 2017-02-18-432543543 -GenerateDownloadUrl

Get the specific invoice by name and include download url in the result.

----- Example 6 -----

Get-AzBillingInvoice -BillingAccountName
00000000-0000-0000-0000-000000000000:00000000-0000-0000-0000-000000000000_0000-00-00 -GenerateDownloadUrl

Get invoices by billing account name and include download url for each invoice in the result.

----- Example 7 -----

```
Get-AzBillingInvoice -Name 0000000000 -BillingAccountName
00000000-0000-0000-0000-000000000000:00000000-0000-0000-0000-000000000000_0000-00-00 -GenerateDownloadUrl
```

Get specific invoice by invoice name and billing account name and include download url for each invoice in the result.

----- Example 8 -----

```
Get-AzBillingInvoice -Latest -BillingAccountName
00000000-0000-0000-0000-000000000000:00000000-0000-0000-0000-000000000000_0000-00-00 -GenerateDownloadUrl
```

Get latest invoice by billing account name and include download url for invoice in the result.

----- Example 9 -----

```
Get-AzBillingInvoice -GenerateDownloadUrl -BillingAccountName
00000000-0000-0000-0000-000000000000:00000000-0000-0000-0000-000000000000_0000-00-00 -BillingProfileName
0000-0000-000-000 -MaxCount 10
```

Get most recent 10 invoices of the specific billing account and specific billing profile and include the download Url in the result.

----- Example 10 -----

```
Get-AzBillingInvoice -Latest -GenerateDownloadUrl -BillingAccountName
00000000-0000-0000-0000-000000000000:00000000-0000-0000-0000-000000000000_0000-00-00
-BillingProfileName 0000-0000-000-000
```

Get latest invoice by billing account name and billing profile name and include download url for invoice in the result.

----- Example 11 -----

```
Get-AzBillingInvoice -BillingAccountName
00000000-0000-0000-0000-000000000000:00000000-0000-0000-0000-000000000000_0000-00-00 -BillingProfileName
0000-0000-000-000
-PeriodStartDate 0000-00-00 -PeriodEndDate 0000-00-00
```

Get invoices by billing account name and billing profile name for a billing period specified by perioStart date and periodEnd date.
