

Windows PowerShell Get-Help on Cmdlet 'Get-AzCosmosDBSqlRestorableDatabase'

PS:\>Get-HELP Get-AzCosmosDBSqlRestorableDatabase -Full

NAME

Get-AzCosmosDBSqlRestorableDatabase

SYNOPSIS

Gets the list of all the restorable Azure Cosmos DB Sql databases available under the restorable account.

SYNTAX

```
Get-AzCosmosDBSqlRestorableDatabase -DatabaseAccountInstanceId <System.String> [-DefaultProfile
    <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] -Location
    <System.String> [<CommonParameters>]
```

```
Get-AzCosmosDBSqlRestorableDatabase [-DefaultProfile
    <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] -InputObject
    <Microsoft.Azure.Management.CosmosDB.Models.PSRestorableDatabaseAccountGetResult> [<CommonParameters>]
```

DESCRIPTION

Gets the list of all the restorable Azure Cosmos DB Sql databases available under the restorable account. The list would have entries corresponding to create, replace

and delete events of all live and deleted databases. This list is useful to identify the restore timestamp based on the changes in the database. For example, if user

wants to restore the database account to a timestamp when a database named foo is deleted, the user can find corresponding database delete event from this list, and

choose a timestamp before the delete event for restore.

PARAMETERS

-DatabaseAccountInstanceId <System.String>

The instance Id of the CosmosDB database account. (This is returned as a part of database account properties).

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with Azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-InputObject <Microsoft.Azure.Management.CosmosDB.Models.PSRestorableDatabaseAccountGetResult>

CosmosDB Restorable Database Account object

Required? true

Position? named

Default value None

Accept pipeline input? True (ByValue)

Accept wildcard characters? false

-Location <System.String>

Name of the Location in string.

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

None

OUTPUTS

Microsoft.Azure.Management.CosmosDB.Models.PSRestorableSqlDatabaseGetResult

NOTES

Get-AzCosmosDBSqlRestorableDatabase -Location "location" -DatabaseAccountInstanceId
"DatabaseAccountInstanceId"

Name : cb04fbfc-4142-413d-b2c5-c91723a17e28
Id :
/subscriptions/{subscriptionId}/providers/Microsoft.DocumentDB/locations/{location}/restorableDatabaseAccounts/{Database
AccountInstanceId}/restorable
SqlDatabases/cb04fbfc-4142-413d-b2c5-c91723
a17e28
Type : Microsoft.DocumentDB/locations/restorableDatabaseAccounts/restorableSqlDatabases
_rid : a+35ZwAAAA==
OperationType : Create
EventTimestamp : 01/20/2021 18:42:37
OwnerId : foo-db1
OwnerResourceId : Ts0YAA==
Database :
Microsoft.Azure.Management.CosmosDB.Models.PSRestorableSqlDatabasePropertiesResourceDatabase

The resource object contains the properties of the database resource
