

Windows PowerShell Get-Help on Cmdlet 'Get-AzIntegrationAccountCertificate'

PS:\>Get-HELP Get-AzIntegrationAccountCertificate -Full

NAME

Get-AzIntegrationAccountCertificate

SYNOPSIS

Gets integration account certificates from a resource group.

SYNTAX

```
Get-AzIntegrationAccountCertificate [-CertificateName <System.String>] [-DefaultProfile  
                                     <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Name  
<System.String>] [-ResourceGroupName <System.String>]  
[<CommonParameters>]
```

DESCRIPTION

The Get-AzIntegrationAccountCertificate cmdlet gets integration account certificates from a resource group. Specify the integration account name, resource group name, and certificate name. This module supports dynamic parameters. To use a dynamic parameter, type it in the command. To discover the names of dynamic parameters, type a hyphen (-) after the cmdlet name, and then press the Tab key repeatedly to cycle through the available parameters. If you

omit a required template parameter, the cmdlet prompts you for the value.

PARAMETERS

-CertificateName <System.String>

Specifies the name of an integration account certificate.

Required? false

Position? named

Default value None
