

Windows PowerShell Get-Help on Cmdlet 'Get-AzManagedApplicationDefinition'

PS:\>Get-HELP Get-AzManagedApplicationDefinition -Full

NAME

Get-AzManagedApplicationDefinition

SYNOPSIS

Gets managed application definitions

SYNTAX

Get-AzManagedApplicationDefinition [-ApiVersion <System.String>] [-DefaultProfile

<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] -Id <System.String>

[-Pre] [<CommonParameters>]

Get-AzManagedApplicationDefinition [-ApiVersion <System.String>] [-DefaultProfile

<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Name

<System.String>] [-Pre] -ResourceGroupName <System.String>

[<CommonParameters>]

DESCRIPTION

The Get-AzManagedApplicationDefinition cmdlet gets managed application definitions

PARAMETERS

`-ApiVersion <System.String>`

When set, indicates the version of the resource provider API to use. If not specified, the API version is automatically determined as the latest available.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

`-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>`

The credentials, account, tenant, and subscription used for communication with azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

`-Id <System.String>`

The fully qualified managed application definition Id, including the subscription. e.g.
`/subscriptions/{subscriptionId}/resourcegroups/{resourceGroupName}`

Required? true

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

`-Name <System.String>`

The managed application definition name.

Required? false

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

-Pre <System.Management.Automation.SwitchParameter>

When set, indicates that the cmdlet should use pre-release API versions when automatically determining which version to use.

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false

-ResourceGroupName <System.String>

The resource group name.

Required? true

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

System.String

OUTPUTS

System.Management.Automation.PSObject

NOTES

Example 1: Get all managed application definitions under a resource group

```
Get-AzManagedApplicationDefinition -ResourceGroupName "MyRG"
```

This command gets the managed application definitions under resource group "MyRG"

----- Example 2: Get a managed application definition -----

```
Get-AzManagedApplicationDefinition -ResourceGroupName "MyRG" -Name "myManagedAppDef"
```

This command gets the managed application definition "myManagedAppDef" under resource group "MyRG"
