

Windows PowerShell Get-Help on Cmdlet 'Get-AzNotificationHubPNSCredential'

PS:\>Get-HELP Get-AzNotificationHubPNSCredential -Full

NAME

Get-AzNotificationHubPNSCredential

SYNOPSIS

Gets the PNS credentials for a notification hub.

SYNTAX

```
Get-AzNotificationHubPNSCredential [-ResourceGroup] <System.String> [-Namespace] <System.String>
[-NotificationHub] <System.String> [-DefaultProfile]
<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>
[<CommonParameters>]
```

DESCRIPTION

The Get-AzNotificationHubPNSCredential cmdlet gets the platform notification service (PNS) credentials for a notification hub. Each notification hub has a single set of PNS credentials. These credentials are applied to individual push notification services such as, but not limited to; the iOS push notification service, the Android push notification service, and Windows Phone 8.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-Namespace <System.String>

Specifies the namespace to which the notification hub is assigned. Namespaces provide a way to group and categorize notification hubs.

Required? true

Position? 1

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

-NotificationHub <System.String>

Specifies the notification hub that the PNS credentials are assigned to. Notification hubs are used to send push notifications to multiple clients regardless of the platform used by those clients.

Required? true

Position? 2

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

-ResourceGroup <System.String>

Specifies the resource group to which the notification hub is assigned. Resource groups organize items such as namespaces, notification hubs, and authorization

rules in ways that help simplify inventory management and Azure administration.

Required? true

Position? 0

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

System.String

OUTPUTS

Microsoft.Azure.Commands.NotificationHubs.Models.NotificationHubAttributes

NOTES

```
Get-AzNotificationHubPNSCredential -Namespace "ContosoNamespace" -ResourceGroup "ContosoNotificationsGroup"  
-NotificationHub "ContosoInternalHub"
```

This command gets the PNS credentials for the notification hub named ContosoInternalHub that belongs to the resource group named ContosoNotificationsGroup.
