## DESCRIPTION

The Get-AzP2sVpnGatewayDetailedConnectionHealth cmdlet enables you to get the detailed information of current point to site connections from P2SVpnGateway. Customer needs to pass SAS url where we can put this detailed health information.

Please note that the SAS url provided should be one for the blob (file) that has been created in the storage account and not the container. Please use the

New-AzStorageBlobSASToken Powershell command and not the New-AzStorageContainerSASToken . You will also need to allow read and write permissions on your SaSURI.
