Windows PowerShell Get-Help on Cmdlet 'Get-AzProviderOperation'

PS:\>Get-HELP Get-AzProviderOperation -Full

NAME

Get-AzProviderOperation

SYNOPSIS

Gets the operations for an Azure resource provider that are securable using Azure RBAC.

SYNTAX

```
Get-AzProviderOperation [[-OperationSearchString] <System.String>] [-DefaultProfile  
    <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>]  
[<CommonParameters>]
```

DESCRIPTION

The Get-AzProviderOperation gets the operations exposed by Azure resource providers. Operations can be composed to create custom roles in Azure RBAC. The command

takes as input an operation search string (with possible wildcard(*) character(s)) which determines the operations details to display. Use Get-AzProviderOperation *

to get all operations for all Azure resource providers. Use Get-AzProviderOperation Microsoft.Compute/* to get all operations of Microsoft.Compute resource provider.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure
