### ***Windows PowerShell Get-Help on Cmdlet 'Get-AzSqlServerKeyVaultKey'***

**PS:\>Get-HELP Get-AzSqlServerKeyVaultKey -Full**

#### **NAME**

Get-AzSqlServerKeyVaultKey

#### **SYNOPSIS**

Gets a SQL server's Key Vault keys.

#### **SYNTAX**

```
Get-AzSqlServerKeyVaultKey [-ResourceGroupName] <System.String> [-ServerName] <System.String> [[-KeyId]
<System.String>] [-DefaultProfile
<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Confirm] [-WhatIf]
[<CommonParameters>]
```

#### **DESCRIPTION**

The Get-AzSqlServerKeyVaultKey cmdlet gets information about the Key Vault keys on a SQL server. You can view all keys on a server or view a specific key by providing the KeyId.

## PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-KeyId <System.String>

The Azure Key Vault KeyId.

Required? false

Position? 2

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

-ResourceGroupName <System.String>

The name of the resource group

Required? true

Position? 0

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

-ServerName <System.String>

The Azure Sql Server name.

Required? true

Position? 1

Default value                None

Accept pipeline input?    True (ByPropertyName)

Accept wildcard characters? false

-Confirm <System.Management.Automation.SwitchParameter>

Prompts you for confirmation before running the cmdlet.

Required?                false

Position?                named

Default value                False

Accept pipeline input?    False

Accept wildcard characters? false

-WhatIf <System.Management.Automation.SwitchParameter>

Shows what would happen if the cmdlet runs. The cmdlet is not run.

Required?                false

Position?                named

Default value                False

Accept pipeline input?    False

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug,

ErrorAction, ErrorVariable, WarningAction, WarningVariable,

OutBuffer, PipelineVariable, and OutVariable. For more information, see

about\_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

## INPUTS

System.String

## OUTPUTS

Microsoft.Azure.Commands.Sql.ServerKeyVaultKey.Model.AzureSqlServerKeyVaultKeyModel

## NOTES

----- Example 1: Get all Key Vault keys -----

```
Get-AzSqlServerKeyVaultKey -ServerName 'ContosoServer' -ResourceGroupName 'ContosoResourceGroup'
```

ResourceGroupName : ContosoResourceGroup

ServerName : ContosoServer

ServerKeyName : contoso\_contosokey\_01234567890123456789012345678901

Type : AzureKeyVault

Uri : https://contoso.vault.azure.net/keys/contosokey/01234567890123456789012345678901

Thumbprint : 1122334455667788990011223344556677889900

CreationDate : 1/1/2017 12:00:00 AM

ResourceGroupName : ContosoResourceGroup

ServerName : ContosoServer

ServerKeyName : contoso\_contosokey2\_01234567890123456789012345678901

Type : AzureKeyVault

Uri : https://contoso.vault.azure.net/keys/contosokey2/09876543210987654321098765432109

Thumbprint : 0099887766554433221100998877665544332211

CreationDate : 1/1/2017 12:00:00 AM

This command gets all the Key Vault keys on a SQL server.

----- Example 2: Get a specific Key Vault key -----

```
$MyServerKeyVaultKey = Get-AzSqlServerKeyVaultKey -KeyId
```

```
'https://contoso.vault.azure.net/keys/contosokey/01234567890123456789012345678901' -ServerName
```

```
'ContosoServer' -ResourceGroupName 'ContosoResourceGroup'
```

This command gets the Key Vault key with Id

'https://contoso.vault.azure.net/keys/contosokey/01234567890123456789012345678901', and then stores it in the

\$MyServerKeyVaultKey variable. You can inspect the properties of \$MyServerKeyVaultKey to get details about the key vault.
