Windows PowerShell Get-Help on Cmdlet 'Get-TpmSupportedFeature'

PS:\>Get-HELP	Get-TpmSupportedFeature	-Full
---------------	-------------------------	-------

NAME

Get-TpmSupportedFeature

#### **SYNOPSIS**

Verifies whether a TPM supports specified features.

# **SYNTAX**

Get-TpmSupportedFeature [[-FeatureList] < StringCollection>] [< CommonParameters>]

## **DESCRIPTION**

The Get-TpmSupportedFeature cmdlet verifies whether a Trusted Platform Module (TPM) supports specified TPM features. Not all TPMs support all features.

### **PARAMETERS**

-FeatureList <StringCollection>

Specifies feature names as a string collection. The cmdlet verifies the features that you specify. If you specify an empty collection, \$Null, or do not include

Page 1/3

Required? false Position? 1  Default value None Accept pipeline input? True (ByValue) Accept wildcard characters? false <commonparameters> This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (https://go.microsoft.com/fwlink/?LinkID=113216).  INPUTS StringCollection This cmdlet accepts a collection of features to verify.  OUTPUTS StringCollection This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.  NOTES</commonparameters>

INPUTS StringCollection This cmdlet accepts a collection of features to verify.  OUTPUTS StringCollection This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
about_CommonParameters (https://go.microsoft.com/fwlink/?LinkID=113216).  INPUTS  StringCollection  This cmdlet accepts a collection of features to verify.  OUTPUTS  StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
INPUTS  StringCollection  This cmdlet accepts a collection of features to verify.  OUTPUTS  StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
StringCollection  This cmdlet accepts a collection of features to verify.  OUTPUTS  StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
StringCollection  This cmdlet accepts a collection of features to verify.  OUTPUTS  StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
This cmdlet accepts a collection of features to verify.  OUTPUTS  StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
OUTPUTS  StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
StringCollection  This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
This cmdlet generates a StringCollection object that contains features that the TPM of the computer supports.
NOTES
NOTES
NOTES
Example 1: Verify support for key attestation
PS C:\> Get-TpmSupportedFeature -FeatureList "Key Attestation"

this parameter, the cmdlet verifies all features.

key attestation Page 2/3

This command verifies whether TPM supports the key attestation feature. The cmdlet displays the string, key attestation, so TPM supports that feature.
