Windows PowerShell Get-Help on Cmdlet 'Get-WinAcceptLanguageFromLanguageListOptOut'

PS:\>Get-HELP Get-WinAcceptLanguageFromLanguageListOptOut -Full

NAME

   Get-WinAcceptLanguageFromLanguageListOptOut

SYNOPSIS

   Gets the HTTP Accept Language from the Language List opt-out setting for the current user account.

SYNTAX

   Get-WinAcceptLanguageFromLanguageListOptOut [<CommonParameters>]

DESCRIPTION

   The Get-WinAcceptLanguageFromLanguageListOptOut cmdlet gets the HTTP Accept Language from Language List

opt-out setting for the current user account. By default, the

   HTTP Accept Language List is automatically generated from the language list of the current user account.

   When set to $True, this setting deletes the current content of the HTTP Accept Language registry key and prevents

changes to the language list from reestablishing the

   key. When set to $False, this setting reestablishes the HTTP Accept Language List that is based on the language list for

the current user account.

PARAMETERS

  <CommonParameters>

    This cmdlet supports the common parameters: Verbose, Debug,

    ErrorAction, ErrorVariable, WarningAction, WarningVariable,

    OutBuffer, PipelineVariable, and OutVariable. For more information, see

    about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

INPUTS

OUTPUTS

  Boolean

    This cmdlet returns a Boolean value that reports the status of the HTTP Accept Language from Language List opt-out

setting for the current user account.

NOTES

  ----------- Example 1: Get the status of the setting -----------

  PS C:\> Get-WinAcceptLanguageFromLanguageListOptOut

  TRUE

  This command returns the status of the HTTP Accept Language from Language List opt-out setting for the current user

account.
