

Windows PowerShell Get-Help on Cmdlet 'Get-WinLanguageBarOption'

PS:\>Get-HELP Get-WinLanguageBarOption -Full

NAME

Get-WinLanguageBarOption

SYNOPSIS

Gets the language bar mode and language bar type for the current user account.

SYNTAX

Get-WinLanguageBarOption [<CommonParameters>]

DESCRIPTION

The Get-WinLanguageBarOption cmdlet gets the language bar type and mode by using a LanguageBar object. The values for the type and mode settings can be either true or false. The default value for each setting is false.

PARAMETERS

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug,

ErrorAction, ErrorVariable, WarningAction, WarningVariable,
OutBuffer, PipelineVariable, and OutVariable. For more information, see
about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

OUTPUTS

LanguageBar

This cmdlet returns an object that contains the following settings.

- IsLegacyLanguageBar . When this setting is set to true, the desktop language bar is used, where available. When this setting is set to false, the modern input

switcher is used. This is recommended. - IsLegacySwitchingMode . When this setting is set to true, the current input method, which includes keyboard layout or

input method editor (IME), is selected for the current application only. When new applications start, the default input method is selected. For more information,

see the Get-WinDefaultInputMethodOverride cmdlet. When this setting is set to false, the input method is selected for all applications and changes only when the

user actively switches input methods (recommended).

NOTES

----- Example 1: Get the settings for the language bar -----

```
PS C:\> Get-WinLanguageBarOption
```

```
IsLegacyLanguageBar  IsLegacySwitchingMode
```

```
-----
```

```
False                False
```

This command returns the current settings for the language bar options for the current user account.
