

Windows PowerShell Get-Help on Cmdlet 'Get-WinUILanguageOverride'

PS:\>Get-HELP Get-WinUILanguageOverride -Full

NAME

Get-WinUILanguageOverride

SYNOPSIS

Gets the Windows UI language override setting for the current user account.

SYNTAX

Get-WinUILanguageOverride [<CommonParameters>]

DESCRIPTION

The Get-WinUILanguageOverride cmdlet displays the user-preferred language override that will be used for the Windows user interface (UI) after a reboot or log off. If

the override setting is not used, Get-WinUILanguageOverride does not return a value. If a change is pending, the Get-WinUILanguageOverride returns the pending value.

For more information, see the Get-WinUserLanguageList and Set-WinUserLanguageList cmdlets.

PARAMETERS

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see [about_CommonParameters](https://go.microsoft.com/fwlink/?LinkID=113216) (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

OUTPUTS

CultureInfo

This cmdlet returns the Windows UI language override for the current user account. For more information about the CultureInfo object, see [CultureInfo Class](https://go.microsoft.com/fwlink/?LinkID=242306) (<https://go.microsoft.com/fwlink/?LinkID=242306>).

NOTES

----- Example 1: Display the language override setting -----

```
PS C:\> Get-WinUILanguageOverride
```

LCID	Name	DisplayName
1033	en-US	English (United States)

This command gets and displays the UI language override setting for the current user account. If the Windows UI language override is not set for the current user account, this command returns a null value.
