Windows PowerShell Get-Help on Cmdlet 'Get-WindowsSearchSetting'

PS:\>Get-HELP Get-WindowsSearchSetting -Full

NAME

   Get-WindowsSearchSetting

SYNOPSIS

   Gets the values of settings for Windows Search.

SYNTAX

   Get-WindowsSearchSetting [<CommonParameters>]

DESCRIPTION

    The Get-WindowsSearchSetting cmdlet gets the values of settings for Windows Search. You can view settings for whether Windows Search displays web results or

   suggestions and whether to display web results and suggestions while using a metered network. You can view settings for whether Windows Search personalizes results,

   including whether Windows Search employs the specific location of the user. You can also see SafeSearch settings.

PARAMETERS

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug,

ErrorAction, ErrorVariable, WarningAction, WarningVariable,

OutBuffer, PipelineVariable, and OutVariable. For more information, see

about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

INPUTS

OUTPUTS

WindowsSearchSetting Returns the values of properties that control Windows Search:

- EnableMeteredWebResultsSetting. Whether Windows Search displays web results and suggestions while using a metered network. - EnableWebResultsSetting. Whether

Windows Search displays web results and suggestions. - SearchExperienceSetting. The experience setting. - WindowsSafeSearchSetting. The value of SafeSearch that

Windows Search uses for queries. SearchExperienceSetting has the following possible values:

- PersonalizedAndLocation. Personalize Windows Search and other Microsoft experiences by using search history, some Microsoft account information, and specific

location of the user. - Personalized. Personalize Windows Search and other Microsoft experiences by using search history and some Microsoft account information,

but do not use specific location of the user. - NotPersonalized. Do not personalize Windows Search and other Microsoft experiences or use specific location of

the user. WindowsSafeSearchSetting has the following possible values:

- Off. Windows Search does not remove adult content from results. - Moderate. Windows Search excludes adult images and videos, but not text, from results. -

Strict. Windows Search excludes adult images, videos, and text from results.

NOTES

------------ Example 1: Get Windows Search settings ------------

PS C:\> Get-WindowsSearchSetting

This command gets Windows Search settings. The console displays the values for the settings.
