

Windows PowerShell Get-Help on Cmdlet 'In'

PS:\>Get-HELP In -Full

NAME

In

SYNOPSIS

A convenience function that executes a script from a specified path.

SYNTAX

In [[-path] <Object>] [[-execute] <ScriptBlock>] [<CommonParameters>]

DESCRIPTION

Before the script block passed to the execute parameter is invoked, the current location is set to the path specified. Once the script block has been executed, the location will be reset to the location the script was in prior to calling In.

PARAMETERS

-path <Object>

The path that the execute block will be executed in.

Required? false

Position? 1

Default value

Accept pipeline input? false

Accept wildcard characters? false

-execute <ScriptBlock>

The script to be executed in the path provided.

Required? false

Position? 2

Default value

Accept pipeline input? false

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).
