Windows PowerShell Get-Help on Cmdlet 'Install-Language'

NAME

Install-Language

SYNOPSIS

Installs a language onto a device.

SYNTAX

Install-Language [-Language] < String> [-AsJob] [-CopyToSettings] [-ExcludeFeatures] [< CommonParameters>]

DESCRIPTION

Downloads and installs the available language components for the specified language onto a device.

You can also change your Display Language by using the International module commands (`Set-WinUILanguageOverride <Installed Language>`)

PARAMETERS

If specified, this parameter will execute the language installation as an async PowerShell job (/powershell/module/microsoft.powershell.core/about/about_jobs).

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false

-CopyToSettings [<SwitchParameter>]

If specified, this parameter sets the System and Default Device Settings (Windows Display Language, regional and locale formats) to the installed language

following the installation.

After a language is added with this command, you have to restart the device or login again for changes to take effect.

Once you log back in, you can change your

Windows Display Language in Settings App to change the device UI language.

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false

-ExcludeFeatures [<SwitchParameter>]

If specified, the associated language Features on Demand won't be installed.

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false
