Default value False
Accept pipeline input? True (ByPropertyName)
Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

System.String[]

System.Management.Automation.SwitchParameter

OUTPUTS

Microsoft.Azure.Management.Monitor.Management.Models.RuleEmailAction

NOTES

Example 1: Create an alert rule email action for service owners

```
New-AzAlertRuleEmail -SendToServiceOwner
```

This command creates an alert rule email action to send for its service owners when an alert rule is fired.

Example 2: Create an alert rule email action for non-service owners

```
New-AzAlertRuleEmail -CustomEmail pattif@contoso.com,davidchew@contoso.net
```

This command creates an alert rule email action for the specified email addresses, but not for the service owners.

Example 3: Create an alert rule email action for service owners and non-service owners

```
New-AzAlertRuleEmail -CustomEmail pattif@contoso.net -SendToServiceOwner
```

This command creates an alert rule email action for the specified address and for its service owners.
