INPUTS

System.String

System.Collections.Hashtable

OUTPUTS

Microsoft.Azure.Management.Monitor.Management.Models.RuleWebhookAction

NOTES

----- Example 1: Create an alert rule webhook -----

```
New-AzAlertRuleWebhook -ServiceUri "http://contoso.com"
```

This command creates an alert rule webhook by specifying only the service URI.

----- Example 2: Create a webhook with one property -----

```
$Actual = New-AzAlertRuleWebhook -ServiceUri "http://contoso.com" -Property @{prop1 = 'value1'}
```

This command creates an alert rule webhook for Contoso.com that has one property, and then stores it in the \$Actual variable.
