NAME

New-AzApplicationGatewayConnectionDraining

SYNOPSIS

Creates a new connection draining configuration for back-end HTTP settings.

SYNTAX

```
New-AzApplicationGatewayConnectionDraining [-DefaultProfile  
<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>  
-DrainTimeoutInSec <System.Int32> -Enabled <System.Boolean> [<CommonParameters>]
```

DESCRIPTION

The New-AzApplicationGatewayConnectionDraining cmdlet creates a new connection draining configuration for back-end HTTP settings.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-DrainTimeoutInSec <System.Int32>

The number of seconds connection draining is active. Acceptable values are from 1 second to 3600 seconds.

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-Enabled <System.Boolean>

Whether connection draining is enabled or not.

Required? true

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug,

ErrorAction, ErrorVariable, WarningAction, WarningVariable,

OutBuffer, PipelineVariable, and OutVariable. For more information, see
about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

None

OUTPUTS

Microsoft.Azure.Commands.Network.Models.PSApplicationGatewayConnectionDraining

NOTES

----- Example 1 -----

```
$connectionDraining = New-AzApplicationGatewayConnectionDraining -Enabled $True -DrainTimeoutInSec 42
```

The command creates a new connection draining configuration with Enabled set to True and DrainTimeoutInSec set to 42 seconds and stores it in \$connectionDraining.
