SYNOPSIS

   Creates a log scrubbing rule for firewall policy

SYNTAX

   New-AzApplicationGatewayFirewallPolicyLogScrubbingRule   [-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>]

   -MatchVariable {RequestHeaderNames | RequestCookieNames | RequestArgNames | RequestPostArgNames | RequestJSONArgNames | RequestIPAddress} [-Selector <System.String>]

   -SelectorMatchOperator {Equals | EqualsAny} -State {Enabled | Disabled} [<CommonParameters>]

DESCRIPTION

The New-AzApplicationGatewayFirewallPolicyLogScrubbingRule creates a log scrubbing rule for firewall policy.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with Azure.

Required?   false

Position?   named

Default value   None

Accept pipeline input?   False

Accept wildcard characters? false

-MatchVariable <System.String>

The variable to be scrubbed from the logs.

Required?   true

Position?   named

Default value   None

Accept pipeline input?   False

Accept wildcard characters? false

-Selector <System.String>

When matchVariable is a collection, operator used to specify which elements in the collection this rule applies to.

Required?   false

Position?   named

Default value   None

Accept pipeline input?   False

Accept wildcard characters? false

-SelectorMatchOperator <System.String>

When matchVariable is a collection, operate on the selector to specify which elements in the collection this rule applies

to.

    Required?   true

    Position?   named

    Default value   None

    Accept pipeline input?   False

    Accept wildcard characters? false

-State <System.String>

    Defines the state of log scrubbing rule. Default value is Enabled.

    Required?   true

    Position?   named

    Default value   Enabled

    Accept pipeline input?   False

    Accept wildcard characters? false

<CommonParameters>

    This cmdlet supports the common parameters: Verbose, Debug,

    ErrorAction, ErrorVariable, WarningAction, WarningVariable,

    OutBuffer, PipelineVariable, and OutVariable. For more information, see

    about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

INPUTS

  None

OUTPUTS

  Microsoft.Azure.Commands.Network.Models.PSApplicationGatewayFirewallPolicySettings
