Windows PowerShell Get-Help on Cmdlet 'New-AzIntegrationAccount'

```
PS:>Get-HELP New-AzIntegrationAccount -Full
```

NAME

New-AzIntegrationAccount

SYNOPSIS

Creates an integration account.

SYNTAX

```
New-AzIntegrationAccount [-DefaultProfile <Object>]
```

<Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer> -Location

<System.String> -Name

```
<System.String> -ResourceGroupName <System.String> [-Sku {Free | Basic | Standard}] [-Confirm] [-WhatIf]
```

[<CommonParameters>]

DESCRIPTION

The `New-AzIntegrationAccount` cmdlet creates an integration account. This cmdlet returns an object that represents the integration account. Specify a name, location,

resource group name, and SKU name. Template parameter file values that you specify at the command line take precedence over template parameter values in a template

parameter object. This module supports dynamic parameters. To use a dynamic parameter, type it in the command. To discover the names of dynamic parameters, type a hyphen (-) after the cmdlet name, and then press the Tab key repeatedly to cycle through the available parameters. If you omit a required template parameter, the cmdlet prompts you for the value.

PARAMETERS

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with azure

Required? false

Position? named

Default value None
