The credentials, account, tenant, and subscription used for communication with Azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-InputObject <Microsoft.Azure.Commands.Management.Storage.Models.PSLocalUser>

Local User Object to Regenerate Password Keys.

Required? true

Position? 0

Default value None

Accept pipeline input? True (ByValue)

Accept wildcard characters? false

-ResourceGroupName <System.String>

Resource Group Name.

Required? true

Position? 0

Default value        None  
Accept pipeline input?    False  
Accept wildcard characters? false

-StorageAccount <Microsoft.Azure.Commands.Management.Storage.Models.PSStorageAccount>

Storage account object

Required?        true  
Position?        named  
Default value        None  
Accept pipeline input?    True (ByValue)  
Accept wildcard characters? false

-StorageAccountName <System.String>

Storage Account Name.

Required?        true  
Position?        1  
Default value        None  
Accept pipeline input?    False  
Accept wildcard characters? false

-UserName <System.String>

The name of local user. The username must contain lowercase letters and numbers only. It must be unique only within the storage account.

Required?        true  
Position?        named  
Default value        None  
Accept pipeline input?    False  
Accept wildcard characters? false

-Confirm <System.Management.Automation.SwitchParameter>

Prompts you for confirmation before running the cmdlet.

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false

-WhatIf <System.Management.Automation.SwitchParameter>

Shows what would happen if the cmdlet runs. The cmdlet is not run.

Required? false

Position? named

Default value False
