NOTES

----- Example 1: Remove managed application by resource ID -----

```
$Application = Get-AzManagedApplication -Name "myApp" -ResourceGroupName "myRG"
```

```
Remove-AzManagedApplication -Id $Application.ResourceId -Force
```

The first command gets a managed application named myApp by using the Get-AzManagedApplication cmdlet. The command stores it in the \$Application variable. The second command removes the managed application identified by the ResourceId property of \$Application.
