NOTES

----- Example 1: Remove a Storage Insight by name -----

```
Remove-AzOperationalInsightsStorageInsight -ResourceGroupName "ContosoResourceGroup" -WorkspaceName  
"MyWorkspace" -Name "MyStorageInsight"
```

This command removes the Storage Insight named MyStorageInsight from the workspace named MyWorkspace in the specified resource group. The command does not specify the

Force parameter, so it prompts you for confirmation before removing the Storage Insight.

--- Example 2: Remove a Storage Insight without confirmation ---

```
$Workspace = Get-AzOperationalInsightsWorkspace -ResourceGroupName "ContosoResourceGroup" -Name  
"MyWorkspace"
```

```
Remove-AzOperationalInsightsStorageInsight -Workspace $Workspace -Name "MyStorageInsight" -Force
```

The first command uses the Get-AzOperationalInsightsWorkspace cmdlet to get the workspace named MyWorkspace, and then stores it in the \$Workspace variable. The second

command removes the storage insight named MyStorageInsight from \$Workspace without prompting you for confirmation.
