-ResourceGroupName <System.String> -ServiceName <System.String> [-Confirm] [-WhatIf] [<CommonParameters>]

Remove-AzPrivateEndpointConnection [-AsJob] [-DefaultProfile  
 <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>] [-Description  
 <System.String>] [-Force] [-PassThru] -ResourceId <System.String> [-Confirm] [-WhatIf] [<CommonParameters>]

## DESCRIPTION

The Remove-AzPrivateEndpointConnection cmdlet removes a private endpoint connection.

## PARAMETERS

-AsJob <System.Management.Automation.SwitchParameter>

Run cmdlet in the background

Required? false

Position? named

Default value False

Accept pipeline input? False

Accept wildcard characters? false

-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>

The credentials, account, tenant, and subscription used for communication with Azure.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

-Description <System.String>

The reason of action.

Required? false

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

-Force <System.Management.Automation.SwitchParameter>

Do not ask for confirmation if you want to delete resource

|                             |       |
|-----------------------------|-------|
| Required?                   | false |
| Position?                   | named |
| Default value               | False |
| Accept pipeline input?      | False |
| Accept wildcard characters? | false |

-Name <System.String>

The name of the private endpoint connection.

|                             |                       |
|-----------------------------|-----------------------|
| Required?                   | true                  |
| Position?                   | named                 |
| Default value               | None                  |
| Accept pipeline input?      | True (ByPropertyName) |
| Accept wildcard characters? | false                 |

-PassThru <System.Management.Automation.SwitchParameter>

Returns an object representing the item with which you are working. By default, this cmdlet does not generate any output.

|                             |       |
|-----------------------------|-------|
| Required?                   | false |
| Position?                   | named |
| Default value               | False |
| Accept pipeline input?      | False |
| Accept wildcard characters? | false |

-PrivateLinkResourceType <System.String>

The private link resource type.

|               |       |
|---------------|-------|
| Required?     | true  |
| Position?     | named |
| Default value | None  |

Accept pipeline input? True (ByValue)

Accept wildcard characters? false

**-ResourceGroupName <System.String>**

The resource group name of the private endpoint connection.

Required? true

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

**-ResourceId <System.String>**

The Azure resource manager id of the private endpoint connection.

Required? true

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

**-ServiceName <System.String>**

The name of service that the private endpoint connection belong to.

Required? true

Position? named

Default value None

Accept pipeline input? True (ByPropertyName)

Accept wildcard characters? false

**-Confirm <System.Management.Automation.SwitchParameter>**

Prompts you for confirmation before running the cmdlet.

|                             |       |
|-----------------------------|-------|
| Required?                   | false |
| Position?                   | named |
| Default value               | False |
| Accept pipeline input?      | False |
| Accept wildcard characters? | false |

-WhatIf <System.Management.Automation.SwitchParameter>

Shows what would happen if the cmdlet runs. The cmdlet is not run.

|                             |       |
|-----------------------------|-------|
| Required?                   | false |
| Position?                   | named |
| Default value               | False |
| Accept pipeline input?      | False |
| Accept wildcard characters? | false |

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see [about\\_CommonParameters \(https://go.microsoft.com/fwlink/?LinkID=113216\)](https://go.microsoft.com/fwlink/?LinkID=113216).

INPUTS

System.String

OUTPUTS

System.Boolean

NOTES

----- Example 1 -----

```
Remove-AzPrivateEndpointConnection -Name MyPrivateEndpointConnection1 -ResourceGroupName  
TestResourceGroup -ServiceName MyPrivateLinkServiceName  
-PrivateLinkResourceType Microsoft.Network/privateLinkServices
```

This example remove a private endpoint connection named MyPrivateEndpointConnection1
