Windows PowerShell Get-Help on Cmdlet 'Rename-NetSwitchTeam'

PS:\>Get-HELP Rename-NetSwitchTeam -Full

NAME

   Rename-NetSwitchTeam

SYNOPSIS

   Changes the name of a switch team.

SYNTAX

   Rename-NetSwitchTeam [-Name] <String> [-NewName] <String> [-AsJob] [-CimSession <CimSession[]>] [-ThrottleLimit <Int32>] [<CommonParameters>]

DESCRIPTION

   The Rename-NetSwitchTeam cmdlet changes the name of a switch team. Only the name of a switch team can be changed by using this cmdlet.

   The current switch team name may contain wildcard characters, as long as the wildcard mask resolves to a single switch team.

   The new switch team name must not match an existing switch team name.

PARAMETERS

  -AsJob [<SwitchParameter>]

    Runs the cmdlet as a background job. Use this parameter to run commands that take a long time to complete.

    Required?   false

    Position?   named

    Default value   False

    Accept pipeline input?   False

    Accept wildcard characters? false

  -CimSession <CimSession[]>

    Runs the cmdlet in a remote session or on a remote computer. Enter a computer name or a session object, such as the

output of a New-CimSession

                                                    (https://go.microsoft.com/fwlink/p/?LinkId=227967)   or

[Get-CimSession](https://go.microsoft.com/fwlink/p/?LinkId=227966)cmdlet. The default is the current session

    on the local computer.

    Required?   false

    Position?   named

    Default value   None

    Accept pipeline input?   False

    Accept wildcard characters? false

  -Name <String>

    Specifies the current name of switch team to rename. Wildcard characters may be used to specify the current switch

team name, as long as the wildcard mask

    resolves to a single switch team.

    Required?   true

    Position?   0

    Default value   None

Accept pipeline input?   False

Accept wildcard characters? false

-NewName <String>

Specifies the new name to give to the switch team. The new name must not already exist. The new name cannot be an

existing switch team or Load-Balancing/Fail-Over

(LBFO) team name.

Required?   true

Position?   1

Default value   None

Accept pipeline input?   False

Accept wildcard characters? false

-ThrottleLimit <Int32>

Specifies the maximum number of concurrent operations that can be established to run the cmdlet. If this parameter is

omitted or a value of `0` is entered, then

Windows PowerShellr calculates an optimum throttle limit for the cmdlet based on the number of CIM cmdlets that are

running on the computer. The throttle limit

applies only to the current cmdlet, not to the session or to the computer.

Required?   false

Position?   named

Default value   None

Accept pipeline input?   False

Accept wildcard characters? false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug,

ErrorAction, ErrorVariable, WarningAction, WarningVariable,

OutBuffer, PipelineVariable, and OutVariable. For more information, see

about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

INPUTS

  None

OUTPUTS

  None

NOTES

  -------------- Example 1: Rename a switch team --------------

  PS C:\>Rename-NetSwitchTeam -Name "MyTeam1" -NewName "SwitchTeam01"

  This command renames the switch team named MyTeam1 to the new name SwitchTeam01.
