**DESCRIPTION**

The Restore-AzDataLakeStoreDeletedItem cmdlet restores a deleted file or folder in Data Lake Store. Requires the path of deleted item in trash returned by

Get-AzDataLakeStoreDeletedItem. Caution: Undeleting files is a best effort operation. There are no guarantees that a file can be restored once it is deleted. The use

of this API is enabled via allowlisting. If your ADL account is not allowlisted, then using this api will throw Not implemented exception. For further information

and assistance please contact Microsoft support.
