DESCRIPTION

This command modifies the configuration of an Instance Failover Group.

The Instance Failover Group's primary region should be used to execute the command.

During preview of the Instance Failover Groups feature, only values greater than or equal to 1 hour are supported for the '-GracePeriodWithDataLossHours' parameter.

PARAMETERS

`-AllowReadOnlyFailoverToPrimary <System.String>`

Whether outages on the secondary server should trigger automatic failover of the read-only endpoint.

Required? false

Position? named

Default value None

Accept pipeline input? False

Accept wildcard characters? false

`-DefaultProfile <Microsoft.Azure.Commands.Common.Authentication.Abstractions.Core.IAzureContextContainer>`
