

Windows PowerShell Get-Help on Cmdlet 'Set-CIPolicyVersion'

PS:\>Get-HELP Set-CIPolicyVersion -Full

NAME

Set-CIPolicyVersion

SYNOPSIS

Updates the version number of the policy.

SYNTAX

Set-CIPolicyVersion -FilePath <String> -Version <String> [<CommonParameters>]

DESCRIPTION

The Set-CIPolicyVersion cmdlet updates the version number of the policy for a signed policy scenario. When you update a signed policy, the policy must be replaced by

a policy that has a signer specified in the UpdatePolicySigners property of the policy. The policy must also be an equal or greater version than the previous policy.

PARAMETERS

-FilePath <String>

Specifies the path of a policy .xml file that this cmdlet updates.

Required?	true
Position?	named
Default value	None
Accept pipeline input?	False
Accept wildcard characters?	false

-Version <String>

Specifies the version string with which this cmdlet replaces the current version of the policy. Specify the version in the following format:

integer.integer.integer.integer. The New-CIPolicy and Merge-CIPolicy cmdlets create policies with the default version of 10.0.0.0.

Required?	true
Position?	named
Default value	None
Accept pipeline input?	False
Accept wildcard characters?	false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see about_CommonParameters (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

OUTPUTS

NOTES

----- Example 1: Update the version number of a policy -----

```
PS C:\> Set-CIPolicyVersion -FilePath '.\Policy.xml' -Version '11.1.0.2'
```

```
PS C:\> Get-Content -Path '.Policy.xml'
```

```
<?xml version="1.0" encoding="utf-8"?>
```

```
<SiPolicy xmlns="urn:schemas-microsoft-com:sipolicy">
```

```
  <VersionEx>11.1.0.2</VersionEx>
```

```
  <PolicyTypeID>{A244370E-44C9-4C06-B551-F6016E563076}</PolicyTypeID>
```

The first command modifies the version of Policy.xml to be 11.1.0.2.

The second command displays the contents of the policy. This example shows the first few lines of the policy, which include the VersionEx property. It now has a value of 11.1.0.2.
