

Windows PowerShell Get-Help on Cmdlet 'Start-DtcDiagnosticResourceManager'

PS:\>Get-HELP Start-DtcDiagnosticResourceManager -Full

NAME

Start-DtcDiagnosticResourceManager

SYNOPSIS

Starts a diagnostic Resource Manager.

SYNTAX

Start-DtcDiagnosticResourceManager [[-Port] <Int32>] [[-Name] <String>] [<CommonParameters>]

DESCRIPTION

The Start-DtcDiagnosticResourceManager cmdlet starts a diagnostic Resource Manager (RM) as a Windows PowerShell background job.

PARAMETERS

-Name <String>

Specifies the name for the diagnostic resource manager to start. You can later refer to the RM by using this name. If you do not specify a name, the RM instance

ID, a GUID, is always assigned to the RM and you can refer to it by that ID.

Required?	false
Position?	1
Default value	None
Accept pipeline input?	False
Accept wildcard characters?	false

-Port <Int32>

Specifies the listening port of the test RM.

Required?	false
Position?	0
Default value	None
Accept pipeline input?	True (ByValue)
Accept wildcard characters?	false

<CommonParameters>

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see [about_CommonParameters](https://go.microsoft.com/fwlink/?LinkID=113216) (<https://go.microsoft.com/fwlink/?LinkID=113216>).

INPUTS

OUTPUTS

NOTES

```
PS C:\> Start-DtcDiagnosticResourceManager -Port 17124 -Name "testRM"
```

This example starts a DTC diagnostic resource manager.
