\$ man alsa-info.sh.1

ALSA-INFO.SH(1) General Commands Manual ALSA-INFO.SH(1)

NAME

alsa-info.sh - command-line utility to gather information about the
ALSA subsystem

SYNOPSIS

alsa-info.sh [options]

DESCRIPTION

alsa-info.sh is a command-line utility gathering information about the
ALSA subsystem. It is used mostly for debugging purposes.

OPTIONS

--upload

Upload contents to the server (www.alsa-project.org or paste?
bin.ca).

--no-upload

Do not upload contents to the remote server.

--stdout

Print information to standard output.

--output FILE

Specify file for output in no-upload mode.

--debug

Run utility as normal, but will not delete file (usually
/tmp/alsa-info.txt).

--with-aplay

Includes output from aplay -l.

--with-amixer

Includes output from amixer.

--with-alsactl

Includes output from alsactl.

--with-configs

Includes output from ~/.asoundrc and /etc/asound.conf if they exist.

--update

Check server for updates.

--about

Print information about authors.

EXAMPLES

alsa-info.sh --no-upload

Will gather all information and show the output file.
