Red Hat Enterprise Linux Release 9.2 Manual Pages on 'buildah-prune.1' command

\$ man buildah-prune.1

buildah-rmi(1) General Commands Manual buildah-rmi(1)

NAME

buildah-prune - Cleanup intermediate images as well as build and mount cache.

SYNOPSIS

buildah prune

DESCRIPTION

Cleanup intermediate images as well as build and mount cache.

OPTIONS

--all, -a

All local images will be removed from the system that do not have containers using the image as a reference image.

--force, -f

This option will cause Buildah to remove all containers that are using the image before removing the image from the system.

EXAMPLE

buildah prune

buildah prune --force
